## 3G 2100MHz/2G Coverage Map

**3G Coverage (2100MHz)\***  
 3G Mobile Voice  
 HSDPA Data  
 Mobile Broadband

**2G On-Street Coverage\***  
 GSM Mobile (2G)  
 GPRS Data

**2G In-Vehicle Coverage\***  
 GSM Mobile (2G)

\*Coverage is dependant on a 3G 2100MHz device.

\*Coverage is dependant on a 3G 2100MHz device.

Visit [www.acnpacific.com.au/3G](http://www.acnpacific.com.au/3G) to view a range of 3G handsets for use in 2100MHz locations.

Visit [www.acnpacific.com.au/2G](http://www.acnpacific.com.au/2G) to view a range of 2G handsets for use in 900MHz locations.

Outside 3G 2100MHz areas, you will require a device capable of accessing GSM 900MHz.

Handset quality or local conditions may prevent or interfere with mobile reception in coverage areas e.g. inside concrete buildings, lift wells, basements, tunnels and road cuttings. High rise buildings may also suffer degradation of service. These maps are not an indication of in-building coverage.
